SUMMARY

IT Undergraduate at the Sri Lanka Institute of Information Technology (SLIIT) with a strong enthusiasm for innovative technologies and problem-solving. Skilled in Java and JavaScript, with hands-on experience in full-stack development and database management. I bring adaptability, teamwork, and resilience under pressure, while staying committed to continuous learning. My goal is to contribute effectively to impactful software solutions in a fast-evolving tech landscape.

EDUCATION

BSc (Hons) in Information Technology Specializing in Information Technology Sep 2022 - Present
Institution: Sri Lanka Institute of Information Technology (SLIIT)

GCE Advanced Level(2018)
Royall College-Horana

G.C.E. Ordinary Level (2015)
Royall College-Horana

CERTIFICATIONS

- **AI for Beginners**
Issued by HP LIFE
- **AI/ML Engineer - Stage 1**
Issued by SLIIT
- **AI/ML Engineer - Stage 2**
Issued by SLIIT
- **AWS SimuLearn: Computing Solutions**
Issued by AWS Training & Certification
Completion Certificate

SKILLS

- **Full-Stack Web Development:** Familiar with the MERN stack (MongoDB, Express.js, React.js, Node.js) with hands-on experience in both frontend and backend development through academic projects and personal practice.
- **Programming Languages & Tools:** Proficient in JavaScript and Python. Skilled in modern development tools and environments such as VS Code, GitHub, Figma, and Android Studio.
- **Database Management:** Experience with MongoDB, including creating, querying, and managing databases.
- **IT Fundamentals & Support:** Solid understanding of Windows-based systems, software installation, basic troubleshooting, and system configuration tasks.
- **Teamwork & Communication:** Effective interpersonal and communication skills, with experience working collaboratively on group projects and presenting technical work clearly.

PROJECTS

IT Project Management 3rd Year Project

- Associated with SLIIT
- Developed a comprehensive platform for managing the fruit supply chain, featuring full CRUD operations for fruit collection, grading, inventory, and orders. Integrated AI-powered fruit grading functionality and secure payment processing, enabling seamless interactions between customers and administrators.
- Platform - Visual Studio Code
- Language: JavaScript
- GitHub Link - <https://github.com/dilinaRandima/Fruit-Managment-System>

Programming Applications and Frameworks 3rd Year Project

- Associated with SLIIT
- full-stack platform for sharing and discovering recipes, featuring Google authentication, full CRUD operations, media uploads, YouTube integration, advanced search, real-time notifications, and social features like liking, commenting, and sharing, all built with React.js, Java Spring Boot, and MongoDB for a seamless and secure user experience.
- Platform- JetBrains/ Visual Studio Code
- Language-Java / JavaScript
- GitHub Link- <https://github.com/dilinaRandima/PAF>

Information Technology Project 2nd Year Project

- Associated with SLIIT
- A real-time emergency response system designed to assist pet owners during critical situations. The service enables users to quickly request an ambulance, with staff able to accept/reject requests and access pet health records instantly. It ensures 24/7 availability, secure data handling, and efficient communication between owners, ambulance staff, and dispatchers. Feedback and service records are maintained to improve quality and reliability of care
- Language-Java Script
- Platform-Visual Studio Code
- GitHub Link - <https://github.com/dilinaRandima/Pet-Ambulance-Service.git>
